

2017
York Region District School Board

DIGITAL TRAINING / PRESENTATION ROOM

York Region District School Board converted an unused auto body classroom into a multipurpose state of the art training and meeting room.

Our team developed specifications and implemented:

- Automatic room combines
- Wireless media presentation
- Audio reinforcement
- Assistive listening
- Ambient light control

Components

- Laser Projection
- Presentation Audio
- Touch Screen Control
- Wireless Media Connectivity
- AODA Compliant
- Auto Room Divide
- Ambient Light Control
- Acoustic Treatments

Services

- System Design
- Tender Documents
- Award Selection
- Construction Progress Reviews

Project Description:

The system design specified laser projection, providing a better total cost of ownership. Crestron room controls allows for simplified user and automatic system configuration with partition wall sensors. Distributed audio provides reinforcement for a variety of presentations. Automatic window shades allow the natural light in but is easily masked for video presentations.
